

AMENDMENTS TO THE SPECIFICATION

Replace paragraph **[0031]** with the following paragraph, with the change shown:

[0031] Fig. 5 shows the components of the configuration tool. The automated intelligent configuration tool includes an expert system 510 with knowledge-based rules that are applied to the inputs 500 entered by the user. The intelligent configuration tool contains knowledge-based rule sets 512, 514, 516, 518, databases 530, 540, 550, 560, and calculation engines 520, used to set communications, protective coordination, etc., and whose GUI screens change based on user input 500. The knowledge-based modules 512, 514, 516, 518 receive the inputs, follow the rules set in the knowledge-based modules by accessing the databases 530, 540, 550, 560 and calculation engines 520, and generates a web-based output settings file 522.
